Our custom crating solutions ensure your items are transported safely and efficiently.

Arnoff Moving & Storage's crating services are unsurpassed in quality and price. Our in-house crate shop builds sturdy crates specially for your needs to withstand the rigors of transportation.

WHY ARE ARNOFF'S CRATES THE PERFECT SOLUTION?

- You want your item(s) to travel safely.
- You expect the best quality at an affordable price.
- You need experienced craters who get it right.

Our team of experts take into consideration all of your needs when we plan your crating project:

- 1) Type of item
- 2) Where it is traveling to
- 3) Weight and dimensions
- 4) Value
- 5) Fragility and/or sensitivity

- All large crates will be made forklift ready for ease of transporting from warehouse to truck to dock.
- Crates are banded for extra safety and labeled with contact information.
- If required, we will adhere special indicators for tipping or damage during the shipping process.

OVERSEAS SHIPPING

To ensure proper overseas shipping, Arnoff uses certified heat treated (HT ISPM) wood so that your valuable cargo is compliant with international treaties and will not be held up during export.

If your cargo is to be shipped in a sea container and is sensitive to moisture, we will shrink wrap your item(s) and seal the contents inside a foil vapor barrier bag, which is heat sealed. This will protect your cargo from long-term exposure to the marine environment.

INSIDE THE CRATE

We use the finest packing materials, from acid free paper and foam for artwork, to heavy duty shrink and bubble wrap for larger items.

Blocking and bracing is carefully constructed to ensure the stability of the item inside the crate so that it arrives without damage and on time.

For sensitive specialty equipment, recessed decking is used at the base of the crate to act as a shock absorber.

NEED YOUR CRATE TRANSPORTED?

Let Arnoff handle the logistics, by truck, sea and air

We will arrange for the delivery of your crated items to anywhere in the world, taking care of all the details and paperwork necessary to move it along quickly and safely.

Once your crate leaves our warehouse, it will ride on a truck equipped with shock-absorbing air-ride suspension to guarantee the smoothest ride possible for your valuable cargo.

Arnoff will track your cargo's journey until it reaches its destination, and keep you informed every step of the way.

We make it as easy as 1-2-3!
